

Dolisha Gandhi

Full-Stack & AI Developer

+91-7014093257 | dolishagandhi@gmail.com | linkedin.com/in/dolishagandhi | github.com/dolishaa29

Education

Modern Institute of Technology & Research Centre (MITRC)

2023 – Present

B.Tech, Computer Science and Technology CGPA: 9.3/10

Experience

Sipify — Software Developer Intern

May 2026 – Present

Contributed to a live production Marketing Campaign and Ads platform using NestJS and Next.js. Engineered REST APIs, campaign launch workflows, and integrated Google and Meta Ads APIs. Optimized PostgreSQL schemas, Cloudflare caching, and AWS workflows. Conducted code optimization, functional testing, and API validation using Postman. Collaborated in Agile workflows through daily Scrum and sprint reviews.

Microsun Global Infotech — Full-Stack Developer Intern

June 2025 – Aug 2025

Developed MERN stack applications, implemented JWT authentication, redesigned backend API modules, and managed Git workflows with Postman API testing.

Personal Projects

AuraHealth — AI-Powered Healthcare Platform

[GitHub](#) | [Live](#)

Tech Stack: React 19, Node.js, Express 5, MongoDB, Socket.IO, WebRTC, Redis, Nginx, Docker, AWS EC2, Cloudinary, Gemini API

- Architected a full-stack telemedicine platform featuring 3 role-based portals (Admin, Doctor, Patient) with JWT authentication, RBAC, and OTP password resets, cutting dependency vulnerabilities from 39 to 0.
- Implemented P2P WebRTC video consultations with WebSocket signaling and Socket.IO chat.
- Developed an SSE-streamed LLM chatbot (Gemini API) with Sarvam Text-to-Speech (TTS), AI symptom triage, medical report analysis, skin analysis, and doctor rating workflows.
- Scaled containerized backend services on AWS EC2 behind an Nginx load balancer with health checks, rate limiting (20 req/min), and Implemented async mutex locking to prevent concurrent slot double-booking.

EduPulse ERP (Education Management System)

[GitHub](#) | [Live](#)

Tech Stack: React, Node.js, Express.js, MongoDB, Material UI, Socket.IO, WebRTC, Gemini API, Docker, AWS EC2

- Architected a 3-portal ERP (Admin/Staff/Student) across 18+ modules using RBAC and REST APIs to prevent unauthorized access and data exposure.
- Implemented facial-recognition attendance using TensorFlow.js with 200m geofencing, Cloudinary media storage, and automated PDF report generation.
- Integrated real-time WebRTC video meetings, Socket.IO chat, and a bilingual Gemini AI support assistant.
- Deployed via Docker on AWS EC2 behind Nginx reverse proxy with HTTPS, configuring cross-origin cookie authentication across Vercel and EC2.

Multi-Agent Research System

[GitHub](#)

Tech Stack: Python, FastAPI, LangChain, Mistral AI, Tavily API, BeautifulSoup, React

- Built an autonomous 3-agent pipeline (Planner, Search Agent, Reader Agent) that decomposes research topics, fetches web data, and synthesizes structured summaries.
- Implemented LangChain tool-calling agents with search API integration and BeautifulSoup scrapers for real-time web extraction.
- Developed a FastAPI backend and React dashboard to visualize step-by-step agent execution.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C

Frontend & UI: HTML5, CSS3, React, Material UI, Tailwind CSS

Backend & Frameworks: Node.js, Express.js, FastAPI, Flask

AI/ML: LangChain, RAG, Agents, Gemini API, OpenAI API, Grok API

Databases: MongoDB, MySQL, PostgreSQL

Cloud & Tools: AWS (EC2, S3), Docker, Git, GitHub, Vercel, Render, Cloudinary

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Achievements

- Winner, Internal College Hackathon** — 1st position at institute-level hackathon for web application design.
- TATA Imagination Hackathon** — Certificate of appreciation for innovative problem-solving.
- Top 10, Cloud Computing Quiz (SkillOcean)** — Ranked among top performers across participating colleges.
- LeetCode** — Solved 300+ DSA problems covering core data structures and algorithms.
